Jonathon Gilliam

Wimauma, FL 33598 • (813) 808-2928 • Jobrogi@gmail.com • https://www.JGilliam.me

PROFESSIONAL SUMMARY

Multi-skilled **Controls & Automation Technician** with extensive experience in industrial electrical troubleshooting, PLC systems, motor controls, robotic drive systems, and high-speed automated conveyance. Strong foundation in ladder logic diagnostics, field sensor integration, industrial networks, and software engineering (C#, C++, Python, JavaScript). Proven track record leading maintenance teams, performing energized electrical work safely (OSHA QED / NFPA 70E standards), and collaborating with engineering teams to minimize facility downtime.

TECHNICAL SKILLS

- **PLCs & Industrial Automation:** Rockwell Automation / Allen-Bradley (ControlLogix, CompactLogix, Studio 5000, RSLinx Classic/Enterprise), Ladder Logic Diagnostics, I/O Configuration, Variable Frequency Drives (Allen-Bradley PowerFlex 525 / 520-series), HMI / SCADA Interfacing.
- **Electrical & Field Instrumentation:** Motor Control Cabinets, Relays, Contactors, 24VDC / 120VAC / 480VAC Circuitry, Photoeyes, Proximity Sensors, Encoders, Limit Switches, Multimeters & Oscilloscopes.
- **Robotics & Safety Systems:** Autonomous Mobile Robots (AMRs), Industrial Robotics (Drive Units, MEA, ODS), Perimeter Safety Controllers (PSC), Safety Circuit Integration, Lockout/Tagout (LOTO), OSHA 1910 Subpart S / NFPA 70E Qualified.
- **Software Development & Networking:** C++, C#, JavaScript, Python, Git, Command Line Diagnostics (ping, ipconfig, nslookup), Network Topology & Routing, REST APIs.

PROFESSIONAL EXPERIENCE

FedEx | St. Petersburg, FL

Maintenance Technician 3 (Controls & Electrical Focus) | *Jan 2026 – Present*

- **Custom PLC Programming & Test Bench Engineering:** Designed, built, and programmed a custom VFD test bench panel from scratch using Allen-Bradley ControlLogix/CompactLogix hardware to dynamically test and validate PowerFlex 525 drives; wrote the full ladder logic application from scratch in **Studio 5000** to interface with discrete/analog I/O cards.
- **PLC & Comms Troubleshooting:** Connected to Allen-Bradley ControlLogix PLCs via Ethernet/IP using **Studio 5000 Logix Designer** and **RSLinx Classic** to monitor online ladder logic, analyze signal flow, and diagnose automation faults across high-speed sorting and conveyor equipment.
- **VFD Integration & Parameterization:** Configured, parameterized, and troubleshot **Allen-Bradley PowerFlex 525 VFDs** over Ethernet/IP, tuning motor parameters, acceleration/deceleration ramps, and clearing fault codes to maintain optimal throughput.
- **Cabinet & Electrical Diagnostics:** Performed electrical diagnostics and controls troubleshooting inside 480VAC/120VAC motor control centers (MCC), high-voltage PLC enclosures, power supplies, safety relays, contactors, and digital/analog I/O field devices.
- **Electrical Safety & Compliance:** Conducted energized and de-energized electrical work as an OSHA qualified QED technician following 1910 Subpart S and Lockout/Tagout (LOTO) protocols.
- **Instrumentation & Field Sensors:** Calibrated, aligned, and verified proper signal output for photo eyes, inductive proximity sensors, rotary encoders, and limit switches to eliminate line stops and operational delays.

Amazon | Tampa, FL

Maintenance Technician 3 | *July 2024 – Dec 2025*

- **Shift Leadership & Operations:** Led a shift of maintenance and controls technicians, directing emergency fault responses, prioritizing work orders, and executing preventive maintenance routines to reduce facility downtime.
- **AMR & Robotic Fleet Diagnostics:** Diagnosed, tore down, and repaired complex electrical, mechanical, and networked automation faults across Amazon Autonomous Mobile Robots (AMRs) and automated material handling floor grids.
- **Component-Level Replacement:** Replaced and calibrated critical robotic subsystems, including Main Electronics Assemblies (MEA), lift motors, and Obstacle Detection Sensors (ODS).
- **Safety Systems & Interlocks:** Executed system resets and diagnostics on Perimeter Safety Controllers (PSC) and safety interlock networks to restore operational continuity safely following safety grid trips.
- **Cross-Functional Collaboration:** Partnered closely with IT, Controls, and Engineering teams to isolate and resolve systemic automation bugs, network routing issues, and hardware communication failures.
- **Conveyor & Mechanical Maintenance:** Installed Dutchman belt splices and performed structural maintenance on sortation belts, rollers, and diverters to preserve material flow.

Amazon | Seffner, FL

Maintenance Technician 2 | *Jan 2022 – July 2024*

- **Automation & Conveyance Support:** Maintained, troubleshot, and serviced automated mobile robotics drives, high-throughput material handling conveyors, and pneumatic/hydraulic subsystems.
- **Network & Sensor Support:** Assisted controls technicians in diagnosing field bus network connectivity, wiring faults, and digital input/output sensor channels.
- **Preventive Maintenance:** Conducted routine inspections, component replacements, and mechanical adjustments on gearboxes, bearings, and drive belts to minimize unplanned line stoppages.

Florida Army National Guard | Tampa, FL

Generator & Heavy Equipment Specialist (91D) | *Oct 2019 – Oct 2025*

- **Field Electrical & Mechanical Repair:** Applied rigorous electrical and mechanical diagnostic principles in tactical field environments to repair diesel generators, mobile power distribution units, and heavy tactical vehicles.
- **Hydraulic & Pneumatic Systems:** Serviced and overhauled high-pressure hydraulic, pneumatic, and DC starting/charging electrical systems under strict military technical manuals (TMs).
- **Training & Readiness:** Trained junior personnel on equipment safety, standard operating procedures, electrical test tools, and preventive maintenance routines to ensure mission readiness.

EDUCATION & TRAINING

- **Army Quartermaster Center & School** – Fort Lee, VA
  Electrical Theory, Diesel Power Generation Systems, & Technical Documentation
- **Certifications / Safety Compliance:**
  - OSHA Qualified Electrical Detail (QED) Technician (1910 Subpart S / NFPA 70E)
  - Lockout / Tagout (LOTO) Safety Authorized
