Experience

FedEx

St. Petersburg, Florida

St. Petersburg

Maintenance Technician 3

JAN 2026 – Present

Electrical & PLC / Controls

- Performed electrical diagnostics and repair inside PLC & motor controlled cabinets, including power supplies, relays, contactors and I/O devices.
- Troubleshoot controls faults across conveyor and sorting equipment using wiring diagrams, ladder logic understanding, and field sensors.
- Conducted safe energized and de – energized work as an OSHA qualified QED technician, following 1910 Subpart S and LOTO procedures.
- Verified proper operation of photo eye, proximity sensors, encoders and limit switches.

Mechanical & Conveyance

- Repaired and maintained conveyors, belts, diverters, rollers, bearings, gearboxes and drives to ensure continuous package flow.
- Performed mechanical teardown and reassembly on motors, pumps, and rotating equipment.
- Installed and aligned conveyor belts, including belt tracking, tensioning and mechanical adjustments

Amazon

Tampa, Florida

Maintenance Technician 3

JULY 2024 – DEC 2026

- Performed diagnostics, teardown and repair on robotic drive units and mechanical components
- Replaced motors, sensors, wheels and electronic assemblies to reduce downtime
- Executed PSC (Perimeter Safety Controller) resets to maintain facility safety and continuity
- Installed Dutchman belt splices and restored conveyor belt integrity
- Worked with IT, Controls and Robotics teams to resolve complex faults
- Lead a shift of maintenance technicians and controls technicians directly resulting in less down time
- Troubleshoot electrical, mechanical, and networked system faults.

Amazon

Seffner, Florida

Maintenance Technician 2

JAN 2022 – JULY 2024

- Performed diagnostics, teardown and repair on robotic drive units and mechanical components
- Replaced motors, sensors, wheels and electronic assemblies to reduce downtime
- Executed PSC (Perimeter Safety Controller) resets to maintain facility safety and continuity
- Installed Dutchman belt splices and restored conveyor belt integrity
- Worked with IT, Controls and Robotics teams to resolve complex faults
- Troubleshoot electrical, mechanical, and networked system faults.

Army

Tampa, Florida

OCT 2019– OCT 2025

- Performed Maintenance and repair on military vehicles and ground support equipment (GSE)
- Applied Electrical and mechanical troubleshooting in field environments

- Serviced hydraulic, pneumatic and brake systems
- Supported readiness drills and equipment inspections
- Trained soldiers on maintenance and operator level procedures

Skills & Interests

Technical:

- C++, C#, Javascript
- React, Node.js, DynamoDB, Stripe API
- Unreal Engine, Unity, Blender, Substance Painter
- PC Building, Basic Networking, Command Line diagnostics (ping, ipconfig, nslookup ect)
- PLC Panel work, PLC ladder logic

Laboratory:

- Multimeter use
- Electrical testing tools
- Mechanical teardown tools
- PLC cabinet components

Interests:

- Game Development
- 3D Modeling
- Web Development
- PC Building
- Automation & Controls
